

Students need a reliable and convenient way to park and move around campus because limited parking near residence halls makes it nearly impossible to leave without losing their spot. For students with the S parking permit, parking is very competitive. The parking app is unreliable and there are only two lots near my residence hall (Capstone). One of the two can only hold about 30 cars though Capstone alone has over 300 residents. The other lot is moderately far and on a very rude hill. It is a hassle to make trips with items or alone at night.
